

# New York State Department of Transportation

Now hiring temporary and permanent Highway Maintenance Workers Trainee 2 positions for the winter season and beyond!

As a Trainee 2, you will be trained and evaluated on several pieces of equipment essential to the Transportation Maintenance program such as the front end loader and the heavy dump truck with plow, wing and spreader. You will be expected to perform productive work while you gain experience operating the equipment in an on-the-job training status. On a routine basis, you will be performing physical maintenance work, operating equipment such as a backhoe, widener, front end loader, large roller, stump grinder, post pounder or other mildly complex equipment. You may occasionally operate some of the more complex equipment if you are trained and certified.

During the winter, everyone including trainees performs snow and ice control activities, such as operating a single-blade plow or the wing plow in a one-person plowing operation. Winter snow and ice control activities will involve a shift in your normal work hours.

## **Minimum Qualifications:**

18 years of age or older

Pass the Department of Civil Service medical exam and pre-employment drug test

A valid, non-restricted Class A or B Commercial Driver's License (CDL), with no airbrake restriction, considered to be in good standing by the Department of Transportation

Department of Transportation (DOT) Certification on DOT heavy dump truck within two weeks after start of employment.
