

Engineering Designer (Drafter)

1st Shift (6:30AM – 3:00PM; Monday – Friday)

Ability to work overtime and weekends.

The **Engineering Designer** is responsible to manage design work and to coordinate all aspects of the McGard Engineering computer and drawing system. This includes the Wind-chill/Pro-Engineer system, hard print files, and prints used in part production.

Education/Skills Required:

- Associate Degree in Mechanical Technology or CADD Technology.
- 2D drawing development.
- Knowledge in manufacturing processes.
- Ability to communicate effectively in English, both written and orally.
- Ability to effectively manage projects including being driven by known project constraints, due dates, and cost goals; will work on multiple projects simultaneously.

Preferred Knowledge/Skills/Abilities:

- Experience with CAD drafting & 3D modeling.
- Experience with CREO 3D CAD software.
- Experience with Windchill product lifecycle management (PLM) software.

McGard offers a competitive wage and benefits package:

- Health, dental, life and disability insurances
- Paid personal and vacation days, and 10 paid holidays
- 401(k) Plan with employer match and annual company contribution
- Quarterly profit-sharing bonus
