

Workforce Development Supply Chain Management

OVERVIEW

This course introduces students to a basic understanding of commerce and supply chain management. Students will learn about careers and businesses involved in the planning, management, and movement of people, materials, and products through various transportation methods. They will gain a knowledge base of the management systems for the flow of goods and services involved in the movement and storage of raw materials, inventory, and finished goods from point of origin to consumption. Students will develop skills needed to plan, manage, and improve a business model.
